

CONSTELLIS
TRAINING CENTER

IMMERSIVE ENVIRONMENTS FOR ELITE TRAINING

GOVERNMENT | MILITARY | LAW ENFORCEMENT | COMMERCIAL

Constellis owns and operates one of the largest private training center in the United States. Based in Moyock, North Carolina, our state-of-the-art training facility, enables high volume, concurrent training and educational capabilities, capable of training 1,500 students at a time, 24 hours-a-day, 365 days-a-year. Our expert instructors include former military and law enforcement personnel including U.S. Army Special Forces, U.S. Navy SEALs, U.S. Army Rangers, U.S. Marine Corps, U.S. Air Force Special Operators, U.S. Coast Guard, and SWAT teams.

SITE FACILITIES

- 3,700-acre private facility
- 2,600-ft. concrete runway and aircraft hangar
- UAS flight operations areas
- 400,000 sq. ft. of structures
- On and Off-road driving tracks
- Onsite lodging and amenities

RANGES & SIMULATORS

- 54 Tactical Ranges
- 28 Firearms Ranges(25-1200yds)
- Live Fire Shoot Houses
- Simunition Shoot Houses
- Live Fire Assault Ranges
- Sniper Ranges
- Maritime & Rail Simulations

OTHER CAPABILITIES

- UAS/C-UAS Testing and Ops
- Advanced Driving and Off-Road
- Tactical Medical Services
- K9 Operations and Training
- Firearms and Tactics
- Predeployment Preparation
- Executive Protection

Join us for the 2026 Tactical Expo

September 17 | Constellis Training Center

- 150+ vendors representing the modern warfare ecosystem
- 1,000+ attendees across defense and security communities
- Live demonstrations across weapons, drones, and tactical systems
- Tactical ranges and operational lanes that mirror real-world conditions

UAS & C-UAS Solutions

Enabling mission readiness through operations, training and maintenance

Constellis delivers complete, turnkey UAS and Counter-UAS (C-UAS) solutions that enhance safety and provide full situational awareness. Through tailored program design, we identify the right combination of aerial platforms, sensors, control systems, operators, training, and logistics to meet specific operational needs.

With deep experience supporting critical infrastructure and government operations, Constellis brings a practical, mission-driven approach to deploying and sustaining UAS and C-UAS programs in real-world environments.

Supporting Mission Operations

The UAS and C-UAS markets are rapidly changing environments, and speed, clarity, and knowledge are critical. Constellis supports UAS and C-UAS deployments across a wide range of operational needs. From infrastructure protection to environmental monitoring, our solutions help organizations maintain visibility, improve response, and operate with confidence. Our expert teams operate as advisors, operators, and trainers, and maintainers providing end-to-end support from program design through deployment and sustainment to support:

Critical infrastructure and facility protection

Perimeter and remote site monitoring

Maritime and aviation surveillance

Emergency response and disaster support

Be Prepared for What's Ahead

Constellis brings deep operational expertise in UAS and C-UAS missions, delivering integrated solutions that combine advanced sensors, aerial platforms, and centralized control systems to enable real-time monitoring and rapid threat detection. Backed by comprehensive training, logistics, and maintenance capabilities, Constellis ensures mission readiness at every stage and scales seamlessly to support diverse environments and evolving security challenges with precision and reliability.
